

ABS Level I Basic

Collection/Disbursement

Version 2.0

Agenda

- 1** Introduction
- 2** Collection/Disbursement components within the ABS basic functionalities
- 3** Cross-cutting Collection/Disbursement functionalities
- 4** Overview of Collection/Disbursement batches
- 5** Interfaces of Collection/Disbursement with external systems
- 6** Summary

Contents of the module

What can you expect in this unit?

You get an insight into:

Cross-cutting Collection/Disbursement functionalities (bookings/work lists)

Usage of Collection/Disbursement components by each functional object

Basic Collection/Disbursement batches of the ABS Core

Interfaces for communication with third party systems

IT architecture (A3K Framework, Client and Batch)

Collection/Disbursement components of ABS predominantly cover all invoicing and payment transaction related functions for the areas premium, claim and commission.

1

- 1** Introduction
- 2** Collection/Disbursement components within the ABS basic functionalities
- 3** Cross-cutting Collection/Disbursement functionalities
- 4** Overview of Collection/Disbursement batches
- 5** Interfaces of Collection/Disbursement with external systems
- 6** Summary

Functional scope of Collection/Disbursement overview

Which functionalities are available in Collection/Disbursement?

The Collection/Disbursement component offers the following basic functionalities

Processing of

- incoming payments
- Bank debit return (direct debit return)
- Transfer returns

Creating

- bank debit (direct debit)
- Transfer

Execution of

- bookings via the booking file (e.g. for manually booked incoming payments, special claim bookings, correction bookings etc.)

Trigger for creating

- Account statements for customer accounts
- Account statements for contract accounts
- Creation of payment slips
- Creditors restricting transferability notifications
- Fund allocations

Creation and management of reminders for

- Contract account
- Customer account

Introduction to the Collection/Disbursement functionality in ABS

Which functions are available in Collection/Disbursement?

Use of Collection/Disbursement functionalities

Providing a sub-ledger accounting within ABS

Use of context-related account types with specific functionalities

Creation of invoice-relevant base data for transfer to the general ledger

Sub-division of Collection/Disbursement components in

Online components for the display and booking of settlement information

Batches which process large volume of accumulated bookings and act as connections to related ABS modules or non-ABS systems (e.g. general ledger accounting)

Account types in Collection/Disbursement 1/3

Which account types are available?

Contract

Contract account

- Serves to display and manage premium-related bookings for the contract.
- Generally, no payments are made from a contract account in ABS. The only exception is the payout of a premium credit.

Contract Expenditure account

- Special account to display and manage expenses paid for the contract
- Is used for payments in the application stage (e.g. expert expenses, medical costs)

Account types in Collection/Disbursement 2/3

Which account types are available?

Claim

Claim account

- Serves to display and manage bookings for a specific claim.
- In addition to the compensation bookings, reserve/liability bookings are also processed via the claim account.
- Bookings for a recourse or an annuity agreement are also processed via the claim account.

Account types in Collection/Disbursement 3/3

Which account types are available?

Person	
Customer account	Is used for the collected/aggregated settlement of several contracts for a customer.
NCP account	- NCP stands for “non-classifiable payments” - Intermediate account serves for “parking” of payments, which cannot be assigned directly to a contract or claim.
Commission Account	- Serves to display and manage commission bookings. Multiple commission accounts are possible for an agent. - Supports various payment methods (e.g. salary payment, rebooking to agent team/group)

Account types used in Collection/Disbursement are either directly connected to a person or are used by the functional objects contract and claim.

2

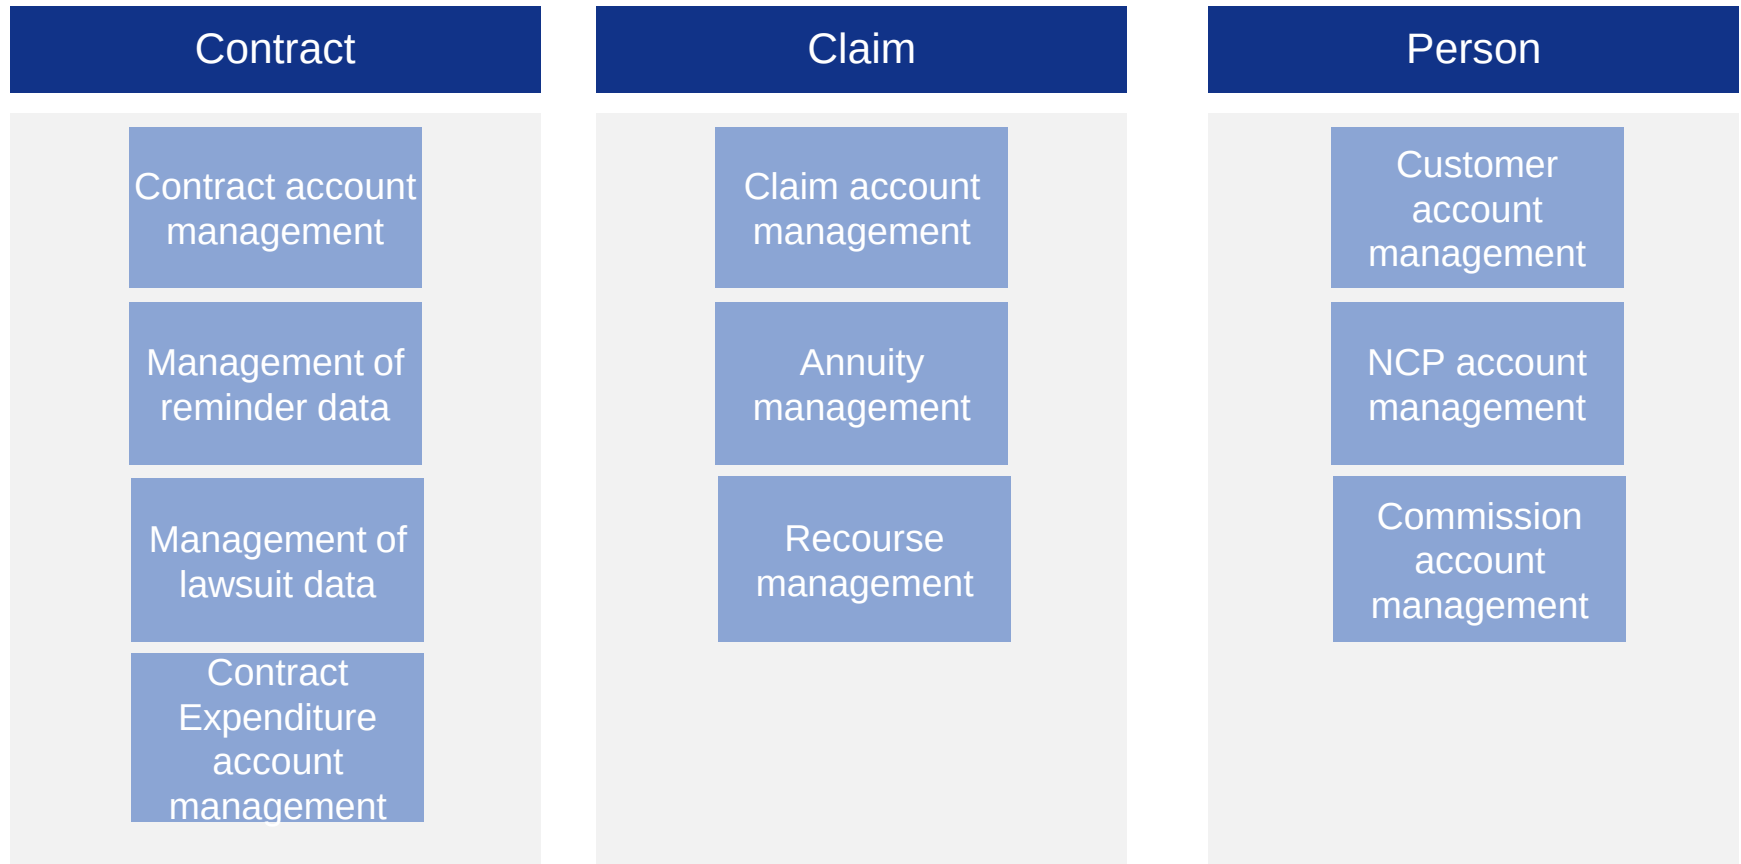

- 1 Introduction
- 2 **Collection/Disbursement components within the ABS basic functionalities**
 - 2.1 Contract
 - 2.2 Claim
 - 2.3 Person
- 3 Cross-cutting Collection/Disbursement functionalities
- 4 Overview of Collection/Disbursement batches
- 5 Interfaces of Collection/Disbursement with external systems
- 6 Summary

Collection/Disbursement functionality for ABS basic functionalities

Which functions exist within the basic function?

Overview of the central functionalities for the basic functionalities

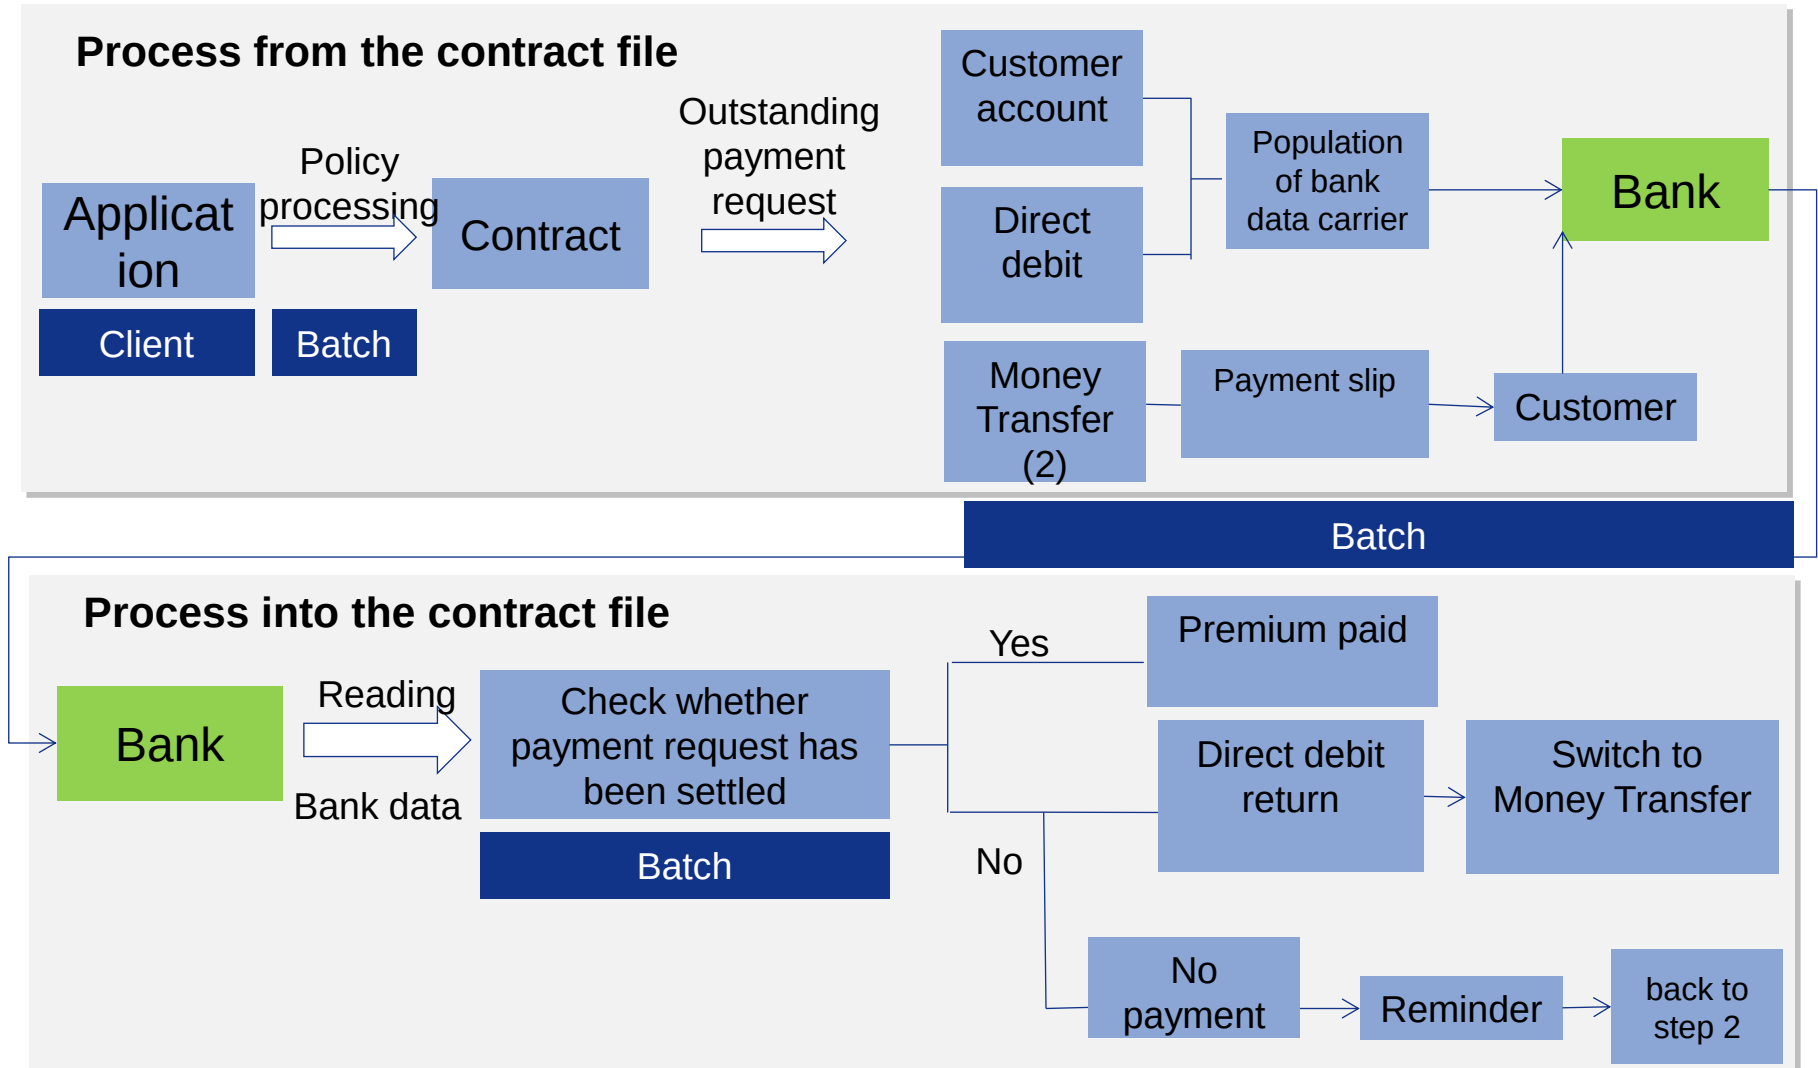

Collection/Disbursement in contract management

Which Collection/Disbursement functions are used by contract management?

Details of Collection/Disbursement functionalities in Contract (extract)			
Contract account	Reminder data	Lawsuit data	Contract expenditure account
• Display of all bookings for a contract • Details of - bookings - insurance classes - commissions • Cancellation option • Pay out and rebooking • Request for account statements	• Account status: - Info - Processing • Stop reminders • Block direct debit • Individual remarks • Scheduled account notification: contract for scheduled task in reminder evidence work list	• Data for the lawsuit • Costs • Individual remarks • Lawyer data	• Expense payment in the application stage • Display of all bookings

High level process for premium processing for a contract

How is the collection process controlled?

Collection/Disbursement in claim processing

Which Collection/Disbursement functions are used by claim management?

Details of Collection/Disbursement functionalities in Claim (extract)

Claim account management

- Account balance and all account transactions
- Different views for: compensations, general claim account, recourses, total
- Pay out and rebooking

Recourse management

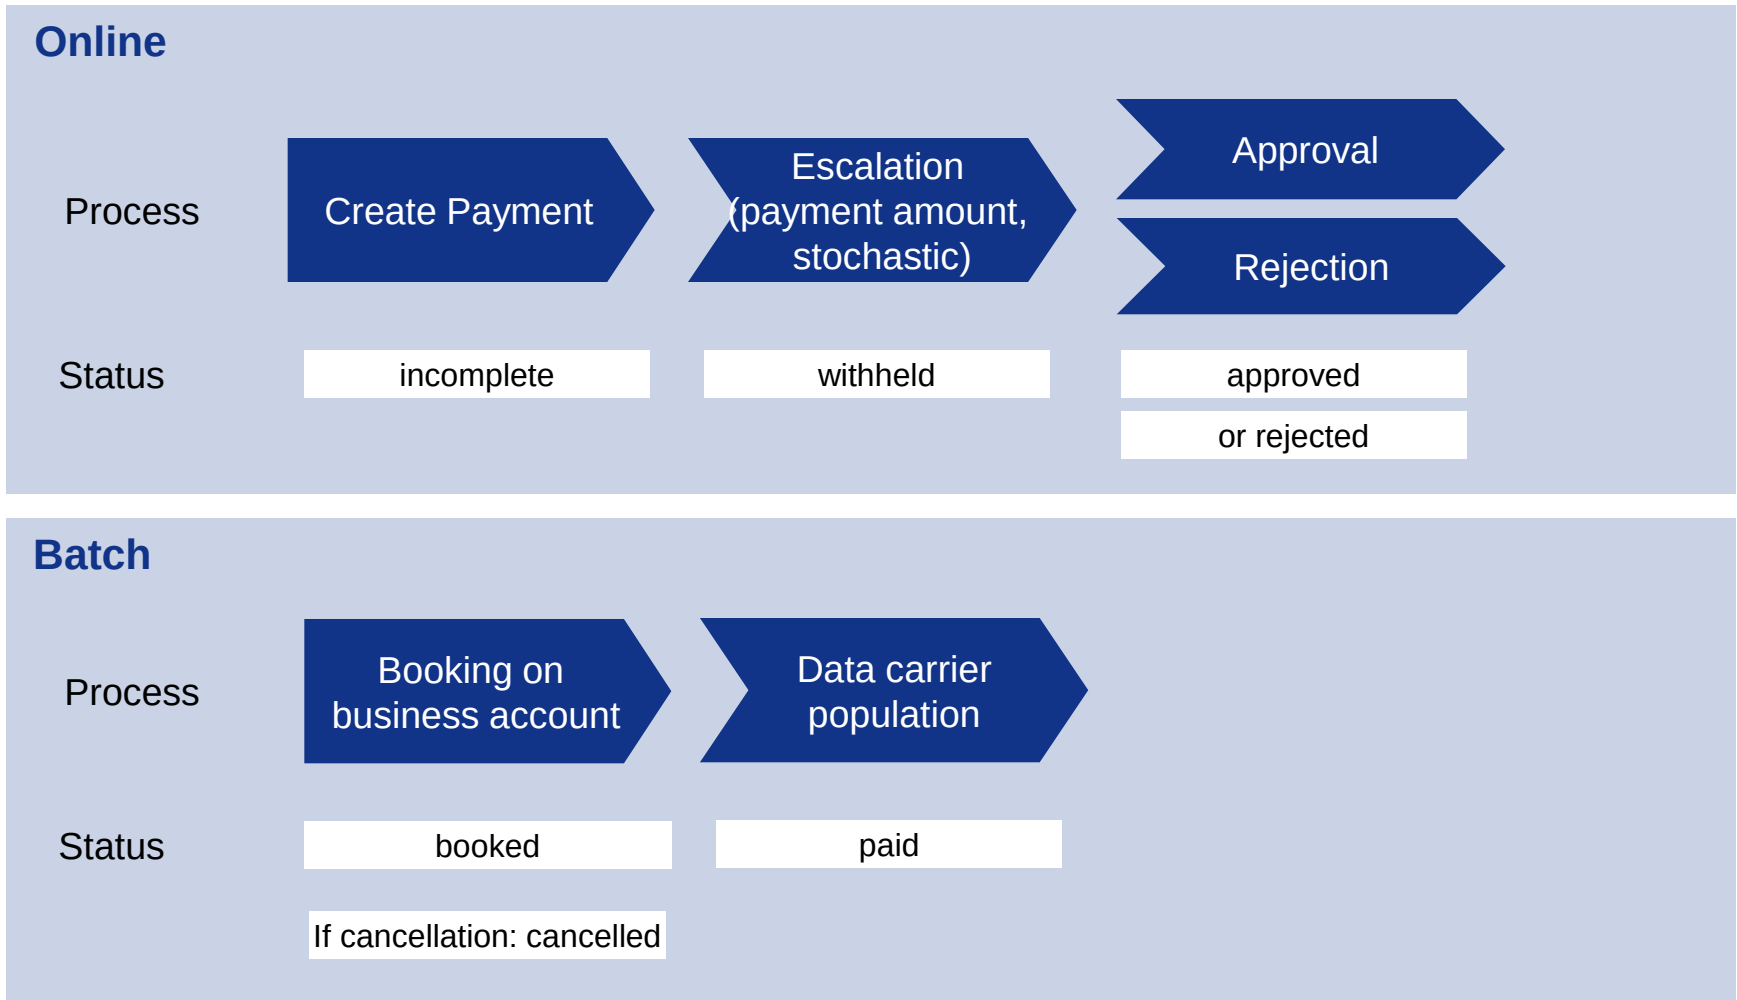

- List of all recourses for a claim
- Details about: recourse sum, recourse agreement (payment frequency), person liable for recourse (bank details)

Annuity management

- Overview annuity agreements
- Details about annuity agreement: annuity start, annuity type, payment frequency
- Details of annuity recipient

Collection/Disbursement in claim processing - payment process

How does a payment proceed?

Collection/Disbursement in person management - person file

Which account types can be distinguished in the person file?

Details of Collection/Disbursement functionalities in Person (extract)

Commission Account	Customer accounts	NCP account
• Balance • Commission overview separated by commission type • Account overview: Commission classification according to area	• Master data • Balance with all account transactions • Pay out • Request for account statements • Individual contracts • Installment plan with information about paid/requested premium • Reminder data	• Balance • Rebookings and pay out

- 6 Summary

Booking file

Which actions can be executed with the booking file?

Manual bookings for following account types:

- Contract, customer account, NCP account
- Claim (incl. recourse)
- Commission account, agent clearing account

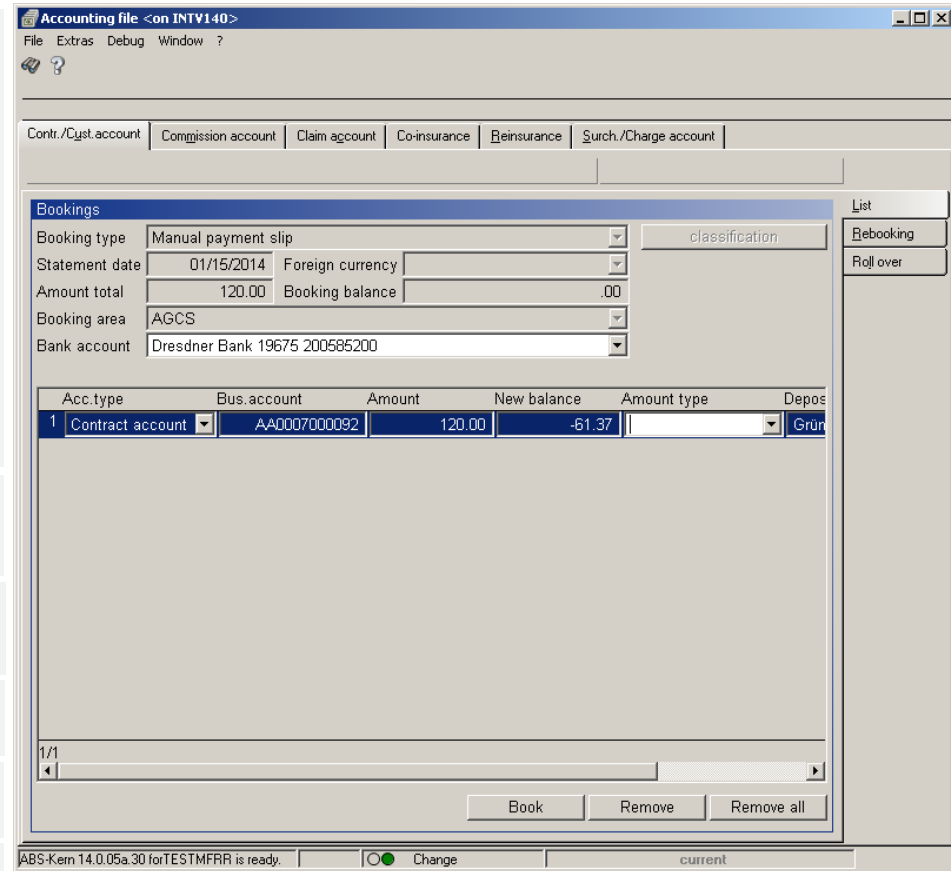

Rebookings between different business accounts

Co-insurance bookings

Reinsurance bookings

Allowance/charge account bookings

Search for and display of accounting vouchers

ABS-Kern 14.0.05a.30 for TESTMFRR is ready. Change current

Work list functionalities in Collection/Disbursement - premium credit work list

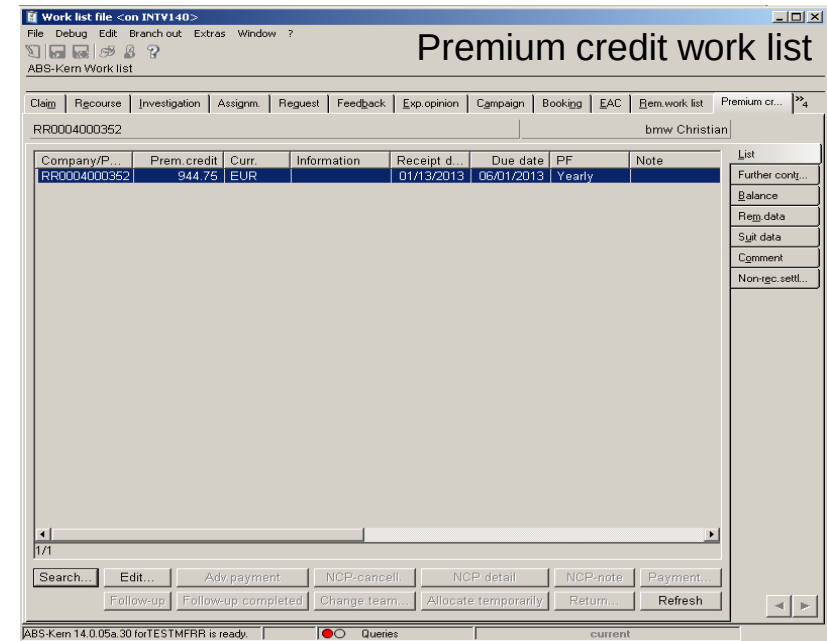

Which information does the premium credit work list contain?

List of all contracts with credit

Credit can be paid out directly from the work list

Other information for processing like balance, reminder data are available in the work list.

Branch out to the contract file is possible any time

Work list functionalities for Collection/Disbursement - reminder evidence work list

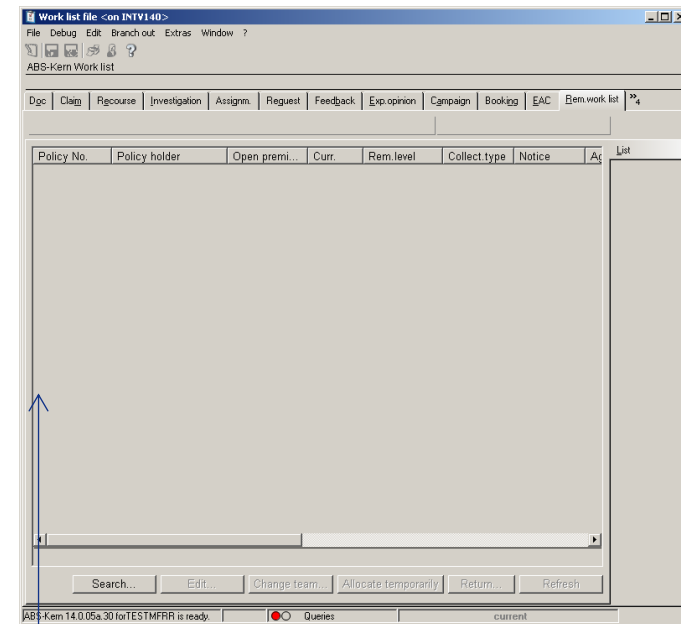

Which information does the reminder evidence work list contain?

Display of all contracts with reminders

Other information about reminder data and reminder history can be displayed in the work list

Changes to the reminder data can be made in the work list

Branch out to the contract file is possible at any time

List of contracts
to be
processed

Work list functionalities for Collection/Disbursement - business customer account work list

Which information does the business customer account work list contain?

Display of business customer accounts to be processed

Detailed information about customer accounts and individual contracts

Creation of a scheduled task in case of a reminder or a bank debit return for the business customer account

Private customer accounts are cancelled in case of a reminder so that reminders take place at the individual contract level

Work list functionalities for Collection/Disbursement - booking work list

Which information does the booking work list contain?

Overview of payment bookings which must be approved

Payment bookings may originate from different areas (e.g. claim, commission account, NCP account)

Bookings can be approved directly via the work list.

4

- 1 Introduction
- 2 Collection/Disbursement components within the ABS basic functionalities
- 3 Cross-cutting Collection/Disbursement functionalities
- 4 Overview of Collection/Disbursement batches**
- 5 Interfaces of Collection/Disbursement with external systems
- 6 Summary

Collection/Disbursement batches - daily post-processing

How often should Collection/Disbursement batches be executed?

Payment interfaces

Incoming payments

Money transfers

Money transfer returns

Direct debits

Direct debit returns

Daily post-processing of the contract

Premium invoicing

Verification of premium based coverage

Collection/Disbursement post-processing

General ledger transition

Booking and transfer work lists

Collection/Disbursement batches - weekly and monthly

How often should Collection/Disbursement batches be executed?

Weekly reminders for contract / customer account

Reminder contract

Reminder customer account with installment plan

Monthly contract batches

Subsequent invoicing

Contract account statements

Monthly claim batches

Recourse invoicing (incl. direct debit)

Annuity payment

Third party claim invoicing

Monthly Collection/Disbursement batches

Monthly / annual closing (Premium, claims, and commissions turnovers)

Co-insurance

5

- 1 Introduction

- 3 Cross-cutting Collection/Disbursement functionalities
- 4 Overview of Collection/Disbursement batches
- 5 Interfaces of Collection/Disbursement with external systems**
- 6 Summary

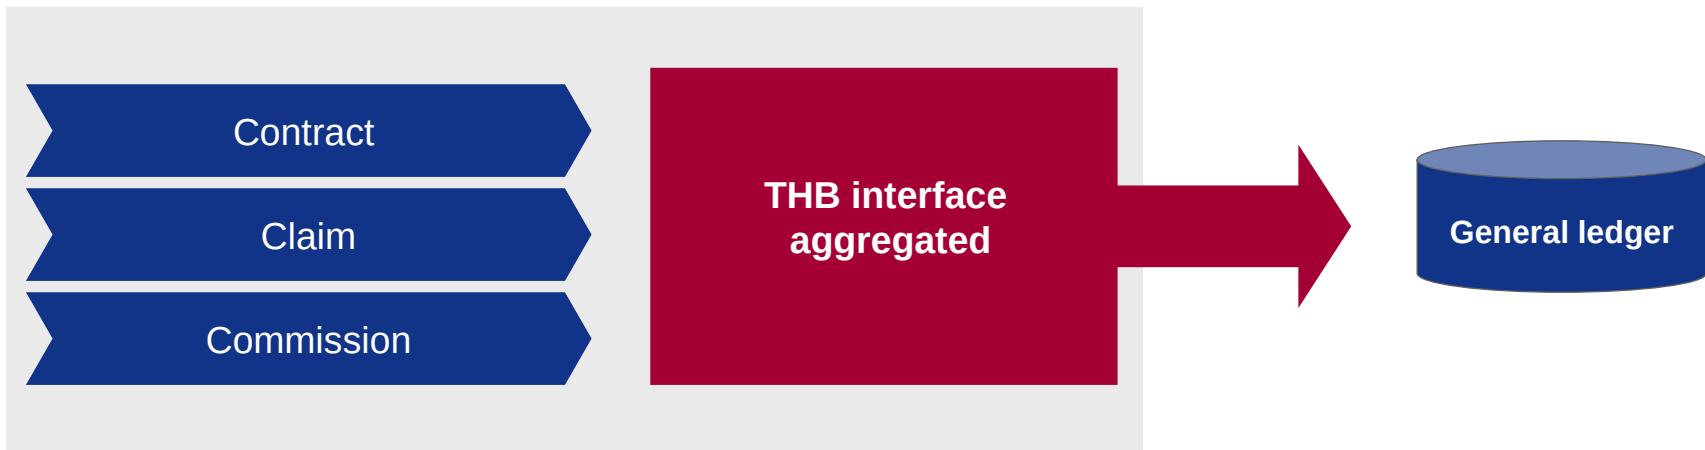

Interaction with the general ledger

How are data transferred to ABS?

General ledger interface

Interface for transfer of booking-relevant basic information to the external general ledger (e.g. SAP). Data is collected in the table THBSCHNITTSTELLE.

During operations most of the bookings from online & batch processing are directly put into THBSCHNITTSTELLE.

Collection/Disbursement delivers the (aggregated) values for management in the main ledger. These data are used to create statistics, balance sheets, etc.
